

# CREATING MONSTERS

The purpose of this activity is to understand/write descriptions to create monsters.

## STEP BY STEP!

by David López

Step 1 – Form pairs.

Step 2 – Ask each pair to draw a monster and describe it.

Step 3 – Ask them to read their description and create a plasticine model of their monster, as a way to check if their description is correct.

Step 4 – You can collect all descriptions and create a book. [See ours!](#)

Step 5 – Alternatively, pairs exchange their descriptions so that others try to create their monsters.

**ENJOY it!**
