Factors que dificulten o faciliten l'avaluació de riscos laborals psicosocials La perspectiva dels tècnics de serveis de prevenció aliens

Barriers and facilitators to the assessment of psychosocial occupational risks: the perspective of practitioners from external OSH services.

Research team: Albert Navarro Giné, Maria Dolors Rodríguez Arjona, Laura Esteve Matalí.

Period: 2023-2024.

Funder: Institut Català de Seguretat i Salut Laboral (Catalan Government).

This study aims to conduct a qualitative analysis to identify the difficulties faced by external occupational risk-prevention services (External Prevention Services, SPA) when carrying out psychosocial risk assessments in the companies they serve, as well as to identify mechanisms to increase the proportion of companies in which such assessments are performed. It therefore seeks to deepen understanding of the low uptake of psychosocial risk assessments among firms that outsource prevention to an SPA, and to clarify how psychosocial risk is approached and managed within companies.
