**Description**

***Provide a short description of the event and its activities.***

From June to November we have done four meetings with Catalan teacher's members of DEMD groups, a working group created by Memorial Democratic and Department of Education of the Catalan Government in order to disseminate democratic memory and the

study of Spanish exile and deportation as interdisciplinary subject in Catalan education system.

In the first meeting, the event organisers (Memorial members) explained the WIRE project and its objectives. In relation to biographies of Spanish and Catalan resistant women, the organisers asked them to share women's life stories they already knew. Finally, the group spoke about the contents they considered most useful for the pedagogical dossier.

In the second meeting, the event organisers introduced the historian Carlos Terraga, who was in charge of writing women's biographies and pedagogical dossiers. The historian proposed to choose from a large list shared by teachers, some Spanish resistant women to write their biography. Everybody agreed about the necessity of giving the highest priority to anonymous women. In relation to the contents of the pedagogical dossier, some teachers suggested to include a section with historical tools to promote student research about local resistant women in high school projects.

Finally, in the last two meetings, the discussion focused on the contents and structure of the pedagogical dossier. After a long debate, the group decided the following structure:

- Introduction to the WIRE project
- KPSI grid (Knowledge and Prior Study Inventory) about the Spanish Civil War, Nazism, World War II and the Resistance.
- Section 1: Comparative analysis about different types of women resistance through two documentaries.
- Section 2: Reading biographies and conducting a critical analysis on women's resistance
- Section 3: Researching and writing biographies
- Glossary of terms
- Annex: 12 biographies and life stories of Spanish resistant women

After this work, we held five workshops with high school students in February 2024 in three Catalan education institutions: Institut Menendez Pelayo (Barcelona), Institut Escola Arts (Barcelona) and Col·legi Mare de Déu de la Mercè (Sant Feliu de Llobregat) with the goal of checking the pedagogical dossier materials.

In these workshops, the twelve life stories of Spanish resistant women written for the WIRE repository were utilized to explain the different forms of female resistance during the Spanish post-civil war. In addition to this, other material from the Witness Archive of the Democratic Memorial, documents from the National Archive of Catalonia and documentaries were used too.

Structure of the workshop:

- Presentation of the Wire Project Women in Resistance (why is the project needed?)
- Contextualization of resistance in post-civil war Spain through images, videos and documentaries (formulation of questions and definition of key concepts)
- Reading and analysing of various stories about the liv of women in Spain, which show different types of female resistance
- Critical reflection on life stories and documentary sources and conceptualization of female resistance and why this kind of resistance has been underrated or invisible for a long time.

The length of these workshops were in all cases of 2 hours and the teachers general feedback was very positive and the vast majority of the 146 students who participated in these workshops were motivated by the work proposed.

In conclusion, overall results were positive and we checked that the material was useful and convenient for educational purposes.
