Microbiology Reference Materials

**Save time and gain peace of mind with easi-tab™ the most convenient microbiology reference material for all your laboratory's needs**

LGC Quality ISO/IEC 17043 | ISO/IEC 17025 | ISO 9001

The LGC easi-tab™ range is ideal for:

- Detection and enumeration
- Daily quality control checks
- Internal quantitative quality control
- Culture media quality monitoring
- Use with our sterile matrix materials
- Training programmes

# easi-tab™

Quick and easy to use, the easi-tab™ range from LGC features the most commonly tested microorganisms in food and water. Each microbe is traceable to the National Collection of Type Cultures or an equivalent strain, and has a defined and certified microbial count.

#### Save time and effort:

- A known count of microbes in each product, which can be used across a range of applications, reducing the need to do serial dilutions.
- Accommodate fluctuations in demand for testing and avoid waste, with two pack size options of 10 or 30 vials or tablets.
- Single batch pre-allocation prevents the need to re-validate new Quality Control batches.\*

**Total confidence that your Quality Management System controls are proven to be working satisfactorily, giving you peace of mind.**

#### We also offer blank matrices which contain no background flora:

- Enabling you to demonstrate that there is no contamination from equipment, people, or the environment.
- Giving you confidence that any interference from the matrix has been assessed.

## About our proficiency testing schemes

Proficiency testing is a requirement for accreditation to ISO/IEC 17025 as well as SQF certification (2.4.4.2), and at LGC AXIO Proficiency Testing we have been leading the direction in proficiency testing for over 40 years.

We bring our technical expertise and influence to drive the future of quality assurance and accreditation, providing proficiency testing schemes with localized support across a truly global network. LGC AXIO supports a wide range of sectors with accredited schemes including; food and animal feed, beverage, consumer safety, water and environmental, clinical, forensic and petroleum. Let's drive quality together.
