

PRO-Clean® | Surface Protein Residue Test

PRO-Clean® quickly and accurately monitors the cleanliness of surfaces to help ensure product quality by detecting protein residues left behind after cleaning. Simply swab a surface, release the reagent, and if protein residue is present the reagent will turn purple. The more contamination present, the quicker and darker the color change to purple. PRO-Clean quickly validates the hygiene of a surface, allowing immediate corrective action to be taken if necessary.

Benefits

- Results in 1-10 minutes
- Easy-to-interpret color change – no instrumentation needed
- Unique liquid stable chemistry produces consistent results
- Pre-moistened swab provides reliable collection, recovery, and detection to ensure consistent results
- Low carbon footprint devices are 100% recyclable

Sensitivity

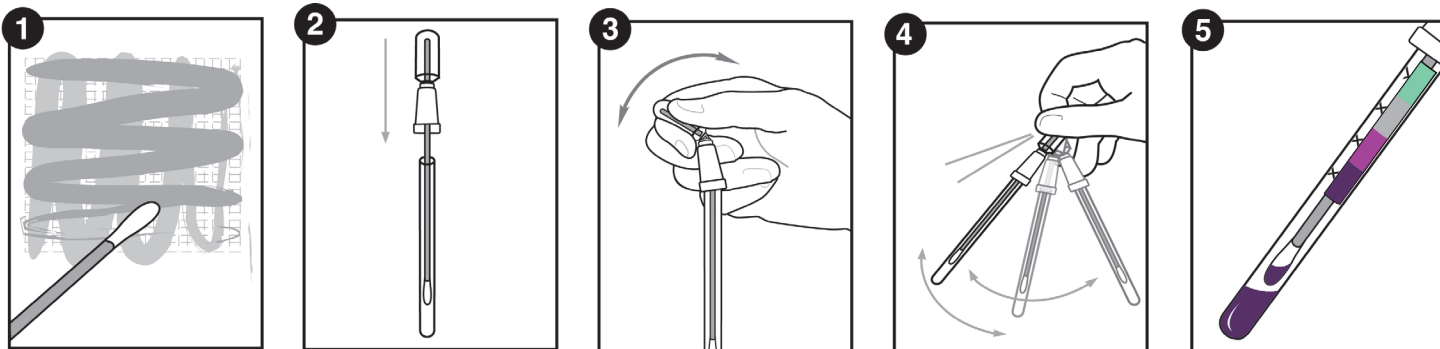

- Detects 80 µg protein after 1 minute
- Detects 50 µg protein after 5 minutes
- Detects 20 µg protein after 10 minutes
- Disregard any color change after 10 minutes

EnSURE® Touch Monitoring System

EnSURE Touch is the next-generation quality monitoring system. It provides rapid and accurate sanitation verification to support your food safety program. EnSURE Touch features a 5" touch screen, wireless sync technology, and cloud-based software. EnSURE Touch is designed to adapt to your workplace, providing the data you need for complex multi-location supply chain monitoring, audit and risk management, and recall prevention.

AquaSnap® Water ATP Tests

AquaSnap measures ATP found in liquid samples, utilizing a honey dipper to consistently collect 100 µL of liquid sample. The device uses a liquid-stable reagent in place of freeze-dried enzymes giving it superior reproducibility and sensitivity. AquaSnap is available in Total and Free format.

AllerFlow Gluten

AllerFlow Gluten is a rapid and convenient test for detection of gluten residue on surfaces. AllerFlow Gluten gives results in 10 minutes and is sensitive to 5 µg (5 ppm) gluten.

AllerSnap®

AllerSnap is a colorimetric allergen prevention test for broad range allergen screening in 15-30 minutes. AllerSnap detects down to 3 µg protein.

SpotCheck Plus

SpotCheck Plus is a colorimetric hygiene test that does not require an instrument and gives results in 60 seconds. It detects glucose and lactose residues that are common components of most food residues.

GL100	SpotCheck Plus: Glucose & Lactose Detection Device	100

SpotCheck Plus | Glucose & Lactose Residue Detection Device

Hygiena's SpotCheck Plus detects the presence of glucose and lactose on a surface as a rapid indicator of surface hygiene. If it turns green, it's not clean!

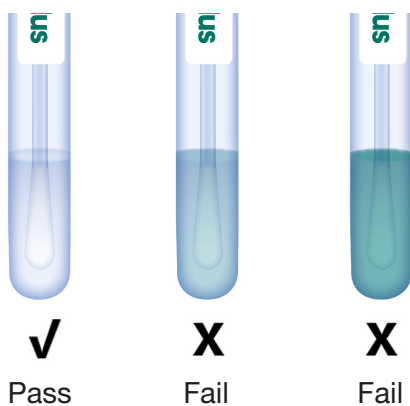

Benefits:

- All-in-one device
- Easy-to-interpret color results—the more glucose/lactose present, the quicker and darker the color change
- Instant validation of surface hygiene allows for immediate corrective action
- No instrumentation necessary
- Results in 60 seconds
- 100% recyclable

Sensitivity:

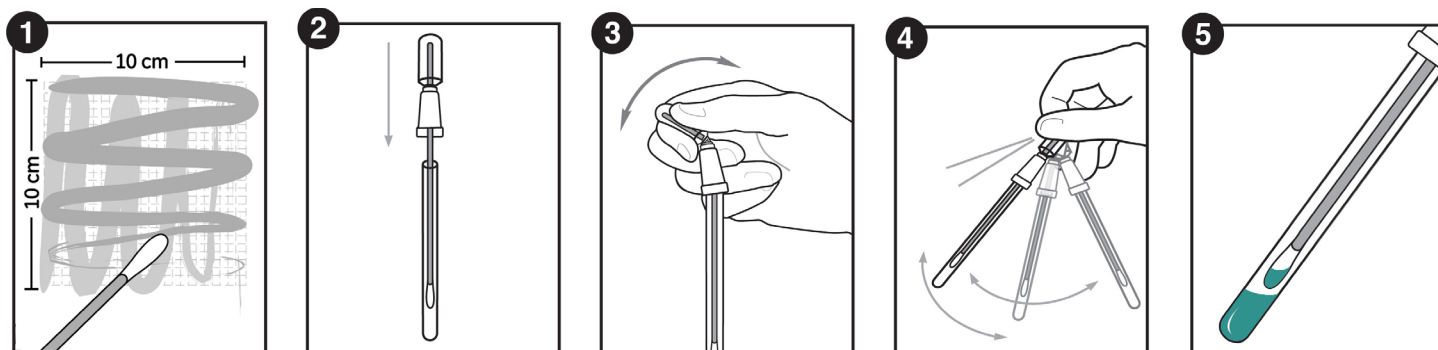

Detects down to 2.5 μ moles D-glucose or 5.0 μ moles lactose in 60 seconds
