

Bioluminescence. Applied to guarding the line.

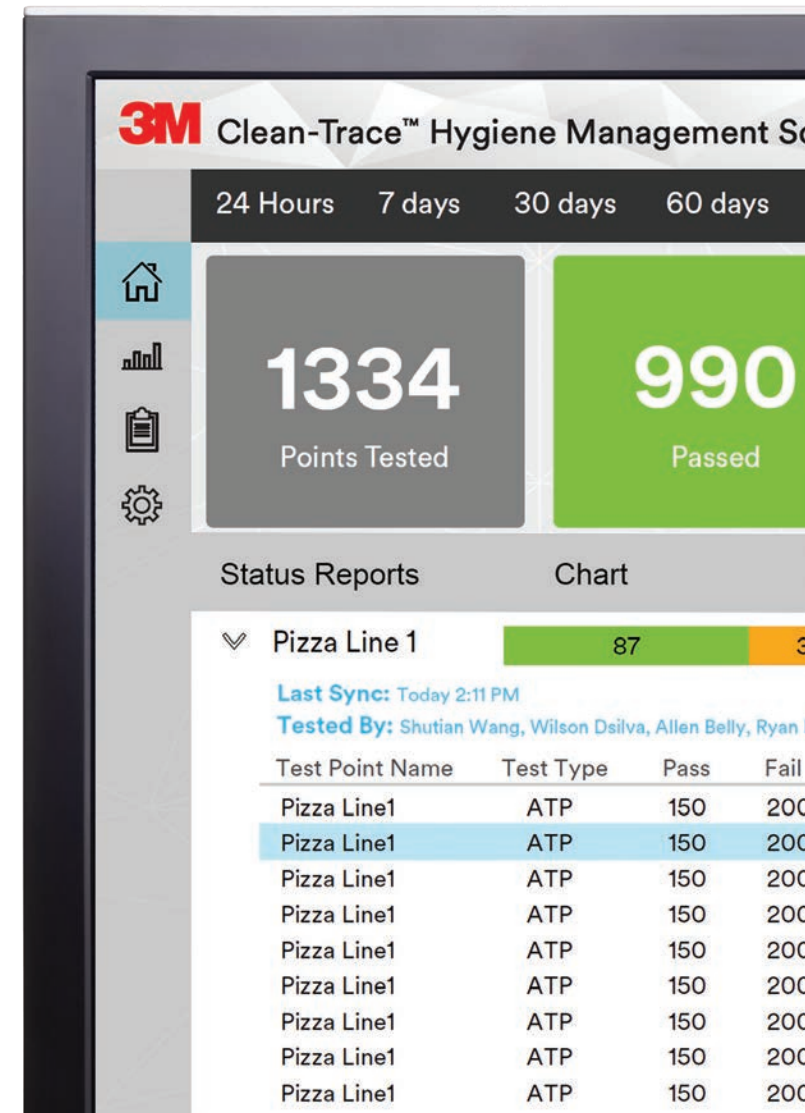

3M™ Clean-Trace™ Hygiene Monitoring and Management System

Meet the new guardian of the line.

Introducing the 3M™ Clean-Trace™ Hygiene Monitoring and Management System

When it comes to hygiene monitoring, you've got a lot on the line — and accurate information is critical. But not all systems are the same. Keep things moving with the Clean-Trace hygiene monitoring and management system, now redesigned and even more reliable. It helps you quickly prepare for and pass your audits. It's designed to give you peace of mind with improved accuracy and breakthrough technology.

Ready when you are.

3M™ Clean-Trace™ ATP Tests

You don't have time for inefficient testing — you need to get in, get your sample and get out. Clean-Trace ATP tests feature an intuitive design that's easy to use and implement, with a long, flexible shape, allowing you to swab even difficult-to-reach areas. The sleek, portable swabs are easy to activate with one hand.

Flexible design
helps you swab
difficult areas

Easy to activate for
increased efficiency

Pre-moistened and
ready to use — just
grab and go

Hygiene monitoring has a new hero.

3M™ Clean-Trace™ Luminometer

The newly redesigned Clean-Trace luminometer features improved ease of use, faster time to result and simple, one-handed operation. Its ergonomic design makes testing simple, minimising training time and costs. With a higher degree of repeatability and the lowest variability in the industry, you'll get accurate results you can count on.

Simple, one-handed operation allows multi-tasking

Wireless capabilities with Bluetooth® Technology

New ergonomic design is comfortable to hold

Powerful. Flexible. Indispensable.

3M™ Clean-Trace™ Hygiene Management Software

Don't waste time searching for reports. Featuring a redesigned dashboard for a quick and easy way to create, store and retrieve reports, Clean-Trace hygiene management software turns data into information, helping you to identify root causes and take action quickly. Now even easier to use and more intuitive with convenient wireless and networking capabilities. Put your data to work identifying workplace trends, optimising productivity and adding value to the process.

Data that works for you.

Data is just data — until it's simplified, streamlined and presented as information that helps you make better, more informed decisions. With Clean-Trace hygiene management software, you can quickly pinpoint exactly where a cleanliness problem occurred and address it. Find areas of concern or predict where issues could happen. Improve cleaning consistency, control and 'right first time' cleaning helping to reduce downtime and achieve a faster return to production. Be proactive and prevent small problems before they become large ones.

- ▶ Intuitive, user-friendly software optimises productivity
- ▶ Redesigned dashboard consolidates information
- ▶ Wireless data transfer streamlines workload
- ▶ Automates data transfer, report generation and delivery

The test that sees beyond the surface.

When people are relying on you to identify and manage risk, you need accurate information. To confidently make these high-risk decisions, you need more than a visual assessment. You need faster results than microbiological tests can deliver. You need a reliable, complete system to help you manage your hygiene monitoring — so you can make the call and get things moving.

	Visual Assessment	Microbiological Tests	ATP Tests
Rapid	+	-	+
Sensitive	-	+	+
Quantitative	-	+	+
Detect product residues	+	-	+
Simple	+	-	+

Microbes and product residue contain Adenosine Triphosphate (ATP), an indicator of biological residues that can be easily detected to measure cleanliness quickly. And unlike other methods, ATP testing is rapid, sensitive, quantitative, effective and simple.

Support you can count on.

Protecting the world's food supply is a big responsibility — but you don't have to do it alone. We've got people to support you locally by providing technical help and exceptional service. It's our job to help you mitigate risk and improve operations — every batch, every shift, every day.

To learn more about how the 3M™ Clean-Trace™ Hygiene Monitoring and Management System can help protect your brand and your business, contact your local 3M representative or visit 3M.com/foodsafety/Clean-Trace.
