Whatever area of microbiology you are involved in, you can be sure changes are happening fast, giving your lab more choice of technologies than ever before.

The rapidmicrobiology newsletter will keep you up to date with the latest developments in products and services for your lab - making sure your microbiology testing is the best it can be!

**Get your FREE rapidmicrobiology.com  
newsletter every week - Sign up now!**

The screenshot shows the website's navigation menu (Home, News, Events, Test Methods, Supplier, Find Products), a search bar, and a disclaimer: "This site is a B2B information site for professional use - we do not sell or distribute any products." Below the navigation are several featured articles and advertisements, including:
 

- "It all starts with a swab." featuring Puritan swabs.
- "Sterility in 6 days" by Charles River.
- "QC INSIDER TOOLBOX" by Lonza.
- "White Paper: Ethicon's Road to QC Automation".
- "Broth Microdilution MIC Plate Reading with BIOMIC V3".
- "Revolutionary Mycoplasma Testing with Next Gen PCR".
- "Evaluation of SARS-CoV-2 Air Contamination in Hospitals".
- "2023 QC Micro Summit" event listing for March 21-23, 2023 in Charleston, United States.

### Always Stay on Top of Microbiology News

From new chromogenic media through to novel multiplex panels, improvements and launches are all in our weekly newsletter.

### Make Informed Decisions

Learn from articles and interviews with industry experts what you need to consider when choosing a technology.

### Special Focus Issues

Discover the latest solutions to the 'hot topics' in your area with our special focus editions.

### Conferences, Webinars and Training Programmes

Browse our events listing for specially selected meetings and webinars that will be relevant to your interest area.

### Make Sure You've Looked at ALL Potential Suppliers

Search our database by sector and target organism. Our easy to use check list will send your enquiry direct to your selected manufacturers.
