

SwabEasy

Environmental Sample Collection Stick Sponges

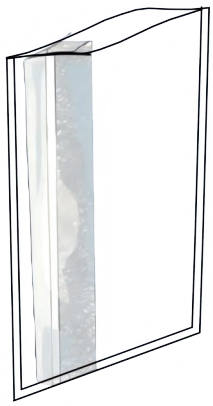

- The SwabEasy makes environmental sampling quick, simple, and reliable.
- Its easy-twist handle connects to a sterile sponge, letting you reach tight corners and hard-to-access surfaces without touching the sponge directly.
- Pre-moistened with 10 mL of specially formulated diluents, the sponge is ready to capture samples efficiently.
- After collection, simply twist off the handle to release the sponge into the bag, secure the closure, and your sample is ready for safe delivery to the lab.
- Designed for convenience and accuracy, the Stick Sponge streamlines your sampling process from start to finish.
- Mantains microorganisms viable 72hrs after sample taken while refrigerated.

Product Code	Product Description	Package
YRBQT0051-001W	SwabEasy with 10 mL Neutralizing Buffer	4 bags of 25 sets
YRBQT0052-001W	SwabEasy with 10 mL Letheen Broth	4 bags of 25 sets
YRBQT0053-001W	SwabEasy with 10 mL D/E Broth	4 bags of 25 sets
YRBQT0054-001W	SwabEasy with 10 mL Buffered Peptone Water	4 bags of 25 sets

Side-filtering Homogenization Bag

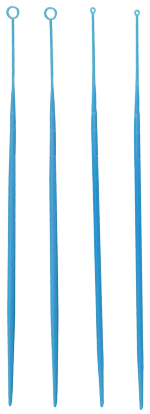

- Made of nylon and polyethylene (PA/PE) composite material, transparent and flexible, with reinforced three-side sealing.
- Contains an inner side filter membrane, suitable for homogenization and filtration of fiber-containing samples such as fruits and vegetables.
- Filter membrane pore size is less than 250 micrometers, made of non-woven fabric.
- Features an easy-tear opening design in the lower middle section for convenient sample retrieval after homogenization.
- Irradiated sterilization, SAL (Sterility Assurance Level) of 10^6

Product Code	07.07.0923
Dimensions	190*300mm
Maximum capacity	400ml
Optimal working capacity	50-300ml
Package	10 bags of 25

Disposable Inoculation Loop

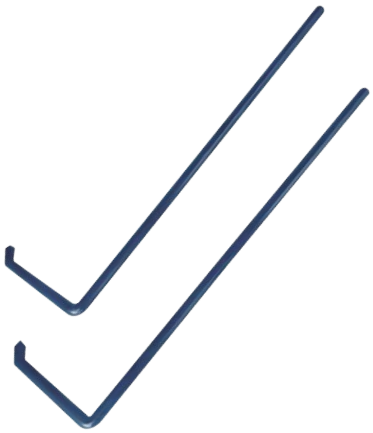

- Irradiation sterilization
- noculation loops are suitable for collecting and inoculating bacterial colonies
- Color-coded to indicate loop size
- Available in individual and bulk packaging

Product Code	07.07.0937	07.07.0939
Volume(μL)	1	10
Length(mm)	202	205
Package	Single-unit paper-plastic packaging, 1000 pieces per box	Single-unit paper-plastic packaging, 1000 pieces per box

L-shaped Spreader

- EO sterilization
- The L-shaped cell spreader is ideal for evenly distributing bacterial cultures.
- The L-shape allows for spreading across the entire petri dish or culture plate surface.
- The smooth spreading surface, with a slight upward curve, reduces the risk of damaging the agar sample.
- Made from high-impact ABS, eliminating the need for flaming or autoclaving.

Product Code	07.07.0941
Length(mm)	145
Width(mm)	38
Package	Single-unit paper-plastic packaging, 500 pieces per box
